NEW SLIM-PET TABLETS FOR DOGS & CATS

Many pets can easily become overweight, and obesity is linked to numerous poor health and joint conditions. Therefore, regular exercise, correct nutrition and smaller but adequate food volumes are all important to maintain a healthy weight and to help avoid joint problems as pets become older.

Slim-Pet's unique blend of vitamins and nutrients have been carefully selected for their roles in helping fill the nutritional gaps arising as a result in dieting, weight loss or times of stress. Slim-Pet Tablets contain a selected blend of herbs and nutrients, traditionally used in periods of increased exercise and weight management programmes

At times like these your pet's nutritional needs can increase significantly and when combined with a calorie controlled diet and an increase in exercise, this daily nutritional supplement could be the boost your pet needs!

PROPERTIES OF MAIN INGREDIENTS:

Seaweed – rich in minerals and trace elements for a healthy metabolism.

Taurine – an amino acid to help and support good cardiovascular health.

Siberian Ginseng – helps to boost physical endurance and maintain healthy Energy levels.

Apple Fibre – a natural source of dietary fibres which helps to deter over eating.

Green Tea – rich in anti-oxidants and thought to boost thermogenesis.

Chlorine – helps to regulate fat & cholesterol management.

Carnitine – helps to convert fat into energy and assist fat metabolism.

Co-Enzyme Q10 – an anti-oxidant vital for energy conversion especially during Periods of increased exercise.

B Vitamins – for energy conversion and when increased energy is required.
